

Product Requirements Document (PRD)

Personal Daily Expense Tracking System

Product Vision

A lightweight, modern web application for personal and family expense tracking that helps monitor daily spending, analyze monthly expenses, and generate insights without requiring user registration or login.

The application is intended for a single household and stores all expense records locally in the database.

Objectives

Primary Goals

- Record daily expenses quickly
 - Categorize household spending
 - Store historical monthly data
 - Generate detailed monthly analytics
 - Provide visual reports and insights
 - Automatically organize expenses month-wise
-

Scope

In Scope

- Expense Entry
- Expense Categories
- Monthly Tracking
- Data Analytics
- Reports
- Dashboard
- Charts
- Historical Records

Out of Scope

- User Registration
- Login System
- Multi-user Support

- Role Management
 - Social Login
 - Payment Integration
-

Expense Categories

Food

Includes:

- Groceries
 - Restaurants
 - Snacks
 - Online Orders
-

Fuel

Includes:

- Petrol
 - Diesel
 - EV Charging
-

Hospital

Includes:

- Doctor Fees
 - Medicines
 - Medical Tests
 - Emergency Expenses
-

Bills

Includes:

- Electricity
- Water
- Internet
- Mobile Recharge

- TV Subscription
-

Home Maintenance

Includes:

- Repairs
 - Plumbing
 - Electrical Work
 - Furniture
 - Cleaning Services
-

Others

Includes:

- Shopping
 - Travel
 - Entertainment
 - Miscellaneous
-

Core Features

Dashboard

The dashboard acts as the homepage.

Displays:

Current Month Spending

Example:

₹15,650

Category Breakdown

Food: ₹5,500

Fuel: ₹2,200

Bills: ₹3,500

Hospital: ₹800

Home Maintenance: ₹2,000

Others: ₹1,650

Monthly Budget Status

Optional:

Budget: ₹20,000

Spent: ₹15,650

Remaining: ₹4,350

Recent Transactions

Last 10 expense entries.

Expense Management

Add Expense

Fields:

Field	Type
Expense Title	Text
Category	Dropdown
Amount	Decimal
Expense Date	Date
Notes	Text

Example:

Title: Grocery Shopping

Category: Food

Amount: ₹1,250

Date: 10 July 2026

Notes: Weekly vegetables and fruits

Edit Expense

Modify:

- Amount
 - Category
 - Date
 - Notes
-

Delete Expense

Remove unwanted entries.

Monthly Data Management

Monthly Organization

Data is stored automatically under:

- Month
- Year

Example:

June 2026

July 2026

August 2026

Monthly Auto Cycle

When a new month begins:

- Dashboard shows only current month expenses
- Previous month becomes archived
- Historical data remains available

No records are deleted.

Historical Records

Users can browse:

Monthly History

Example:

January 2026

February 2026

March 2026

For each month:

- Total Spending
 - Category Breakdown
 - Charts
 - Trends
-

Advanced Data Analytics

Monthly Expense Analysis

Calculate:

Total Expense

Daily Average Spending

Highest Expense Entry

Lowest Expense Entry

Most Used Category

Least Used Category

Number of Transactions

Category Analysis

For every category:

- Total Amount
- Percentage of Monthly Spending
- Average Transaction Value
- Expense Frequency

Example:

Food

₹5,500

35%

22 Transactions

Average ₹250

Trend Analysis

Compare:

Current Month vs Previous Month

Example:

Food Spending

June: ₹4,500

July: ₹5,500

Increase: ₹1,000 (+22%)

Smart Financial Insights

Generate automatic insights.

Examples:

"Food spending accounts for 42% of monthly expenses."

"Fuel expenses increased by 18% compared to last month."

"Home maintenance costs are higher than average."

"Hospital expenses remained stable."

Reports

Monthly Report

Contains:

- Total Spending
 - Category Summary
 - Top Expenses
 - Monthly Trends
 - Insights
-

Recommended Tech Stack

Frontend:

- Next.js
- React
- Tailwind CSS
- ShadCN UI
- Recharts

Backend:

- Next.js API Routes

Database:

- SQLite (Personal Use)
- PostgreSQL (Future Upgrade)

ORM:

- Prisma

Future Enhancements

- Budget Alerts
- Recurring Expenses
- Receipt Upload
- OCR Bill Scanning
- AI Expense Prediction
- Voice Expense Entry
- WhatsApp Expense Logging

Success Criteria

- Add expense within 5 seconds
- Monthly reports generated instantly
- Accurate category analytics
- Clean and responsive interface
- Zero data loss across monthly cycles
